

What Syn-flex Does

Syn-flex™ is a breakthrough product in the treatment of osteoarthritis, joint pain, and cartilage degeneration. While most glucosamine products available today are in capsule or pill form, Syn-flex™ is a liquid glucosamine formula that provides maximum glucosamine absorption and complete treatment of osteoarthritis and articular joint pain.

The high quality pharmaceutical grade liquid Glucosamine Sulfate and Glucosamine HCL combine with twelve other ingredients in a formula designed to...

- Effectively treat and prevent arthritis
- Stop articular joint pain
- Restore joint health
- Stimulate the production of Synovial fluid
- Rebuild and rehabilitate damaged cartilage
- Prevent future deterioration of cartilage
- Reduce inflammation
- Improve mobility

Syn-flex binds to damaged cartilage and boosts cartilage metabolism, facilitating repair processes. At the same time, it blocks the action of destructive enzymes that promote joint inflammation, break down the synovial fluid, and attack the cartilage.

Syn-flex stimulates the synovial membrane to manufacture new synovial fluid to replace the thin, degraded fluid of joint disease. By doing so, Syn-flex™ helps lubricate, nourish, and clean the cartilage.

Why Syn-flex™ Is Better

Glucosamine has been proven to effectively treat osteoarthritis. However, most glucosamine products on the market today come in capsule or pill form. This means that the glucosamine in these products is delivered in powdered form, which is not absorbed very well. Syn-flex™, on the other hand uses pharmaceutical grade liquid Glucosamine Sulfate and Glucosamine HCL for a full 98% absorption rate, maximum bioavailability, and fastest relief.

Taking these capsule glucosamine products for your arthritis it will usually take between six to ten weeks before you begin to notice any results. However, with Syn-flex™, most of our customers report noticing significant pain relief in ten to fourteen days.

Even in the most severe and advanced cases of osteoarthritis, the large majority of our users report significant improvement in 20-25 days. Even better, Syn-flex™ has no serious side effects unlike Cox-11 inhibitors Vioxx® and Celebrex®.

Our Solid Guarantee

Syn-flex is FULLY GUARANTEED to significantly reduce your pain and effectively treat your arthritis. If you do not feel a positive impact on your arthritis within the use of the first 8-oz. bottle, we'll refund your money with no questions asked.

We have over 32 pages of customer feedback on Syn-flex available. In short, it has been tremendous and overwhelmingly positive.

The Ingredients in Syn-flex™

To ensure the highest standards of quality each batch of Syn-flex goes through lab analysis to verify efficacy and amount of ingredients.

Certified Ingredients Per 1/4 oz. of Syn-flex™
